

# MORE THAN A CANDLE

## Soy Product Information and Pricing Sheet

### ABOUT SOY CANDLES

Quality matters to us! These soy candles have sustained fragrance, the best burn time possible and an overall great performance – resulting in a very high quality candle we are proud to offer. The difference is in the wax! – How it’s created, how it burns and the impact it has on the environment. Most commercially available candles are made with paraffin wax, which is a byproduct of the petroleum industry. If you are concerned about the cleanliness and safety of the air that you breathe, then you should look for alternatives, such as our luxury soy candles.

Why is this important?

- Our candles are all made using 100% soya beans – a natural renewable product.
- They burn up to 50% longer than paraffin candles.
- They create no soot or harmful gases when burning.
- They are non-toxic, biodegradable and contain no animal fats.
- As soy wax accepts fragrance easily, without the need for chemical assistance, you can scent your home more quickly with your favorite fragrance, and know that it is safe.

If you love candles, our luxury soy wax candles are a good choice for the health of any family.

FEATURES	BENEFITS
WAX	Our soy wax is premium grade without additives, from reputable suppliers.
FRAGRANCES	Contains only 100% premium fragrances (the highest grade) that contain no heavy metals.
WICK	Lead-free 100% cotton wicks

### DIRECTIONS FOR USE

1. Be sure to keep your wick trimmed to ¼” before lighting.
2. Light your candle and let it burn for 45-60 minutes to ensure even melting
3. Enjoy!
